Custom MARBLE PRODUCTS

Design the kitchen and bathroom of your dreams
with cast polymer products!

Cast polymer is the term used to describe cultured marble, cultured granite and cultured onyx, and solid surface products used in both residential and commercial design. Cast polymer products are man-made, mineral filled materials chemically bonded together. Then the composite is poured into a mold and hardened to create the perfect surface: countertop, vanity top, tub, shower or fireplace surround, just to name a few. Cast polymer allows you to create a seamless, designer look in the shape you need at an affordable price.

Let Custom Marble Products, the Wilmington area kitchen & bath specialist, assist you with your project. Custom Marble Products is a locally owned business that has been successfully operated for 20 years. We have the experience and expertise to help you design your perfect kitchen or bath.

Many different sink styles to choose from. Visit us online for a complete listing of products, styles and finishes.

CUSTOMMARBLEPRODUCTSINC.COM

As members of ICMA, our products meet or exceed the industry standard in quality, appearance and durability. Regular testing and certification by Universal Laboratory, Inc. mean our cast polymer products meet the ANSI Z124.3-95 performance requirements. Many of our technicians are CCT-certified, the recognized industry experts in manufacturing cast polymer products.

Custom Marble Products is committed to having the highest quality technicians install the highest quality products. We are excited about the design possibilities of cast polymers and would love to help you make your dream kitchen or bath a reality.

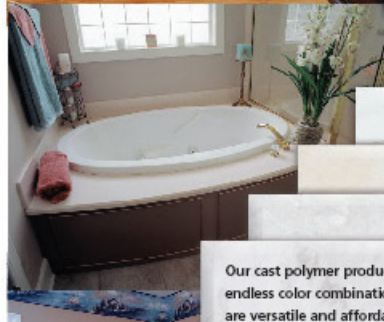

Visit us online for a complete product listing or come experience the quality and beauty in person at our showroom located on North Kerr Avenue in Wilmington, North Carolina.

Advantages of our cast polymer products:

- ◆ affordable designer look
- ◆ seamless construction
- ◆ one piece construction available including integral sink
- ◆ endless design possibilities
- ◆ custom colors & textures
- ◆ curved & custom shapes
- ◆ uniformity of color
- ◆ easy maintenance
- ◆ stain resistant
- ◆ non-porous
- ◆ mold/mildew resistant
- ◆ strength and durability
- ◆ less brittle than quarried marble
- ◆ resists scratches & breaks

Our cast polymer products have endless color combinations that are versatile and affordable. Any shade or color you like can be interchanged to create a totally custom look specific to your design project. Visit us online at our showroom and see the many beautiful detail and color choices available to you.
